PROFESSIONAL SUMMARY

Geology graduate with strong academic and field-based experience in geological mapping, rock identification, and terrain analysis. Over two years of applied fieldwork on large infrastructure projects, integrating geological knowledge with engineering challenges. Highly motivated to pursue graduate research in geology, with a focus on sustainable infrastructure, geotechnical analysis, and applied field studies.

EDUCATION

Bachelor of Science in Geology – Trichandra Multiple Campus, Tribhuvan University, Kathmandu
Graduated with First Division Honors

- Core Coursework: Engineering Geology, Geomorphology, Soil Mechanics
- Fieldwork: Geological mapping, rock identification, terrain analysis, and site investigations

Higher Secondary Education (Science Stream – Civil Engineering Focus) – Shree Padma Secondary School, Bhaktapur

- GPA: 3.19 (B+)
- Key Subjects: Geotechnical Engineering, Road Construction, Physics, Chemistry, Mathematics

Secondary Education Examination (SEE) – Shree Bhanu Jana Secondary School, Taplejung

- GPA: 3.32 | Technical & Vocational Stream (Civil Engineering)
-

RESEARCH & FIELD EXPERIENCE

Paudyal, S. (2026). The Flood and Challenges of Rasuwagadhi–Kerung Border.

GeoWorld Students Journal, Tribhuvan University.

- Analyzed flood dynamics and transboundary challenges in the Rasuwagadhi–Kerung corridor.

- Discussed geological, geomorphological, and infrastructural vulnerabilities in a high-mountain border region.
- Emphasized implications for disaster risk management and sustainable cross-border infrastructure.

Geological Fieldwork – Bachelor’s Program

- Conducted detailed geological mapping and rock identification across multiple terrains.
- Applied knowledge of soil mechanics and geomorphology to analyze site suitability for infrastructure projects.
- Assisted in field data collection, lab analysis, and report preparation for geological studies.

Projects & Internships

- **Madhyaphawa Khola Jalabidhyut Co-operative Ltd., Phung, Nepal (6 Months OJT)** – Applied civil and geological knowledge for small-scale hydroelectric project investigations.
- **Suryabinayak & Phungling Municipalities (3 Months Each)** – Gained practical experience in municipal civil works and local geotechnical assessments.

WORK EXPERIENCE

Civil Sub-Engineer – Rastriya Prasaran Grid Company Limited (RPGCL), Mewa-Changhe 132 kV Transmission Line Project, Taplejung | 2+ Years

- Supervised on-site construction of tower foundations, ensuring compliance with engineering and safety standards.
 - Conducted site investigations: leveling, surveying, and soil testing to optimize foundation design.
 - Maintained project documentation: progress reports, quantity tracking, and coordination with contractors and authorities.
 - Key Achievements: Successfully completed multiple tower foundations in challenging terrain; improved daily reporting and communication workflows.
-

TECHNICAL SKILLS

- **Geology & Fieldwork:** Geological mapping, rock identification, soil testing, terrain analysis.
 - **Civil & Surveying:** Foundation construction, leveling, site alignment, and material monitoring.
 - **Software:** AutoCAD (2D drafting), MS Excel & Word (reporting, quantity tracking).
 - **Collaboration & Coordination:** Effective liaison with engineers, contractors, and local teams for field operations.
-

VOLUNTEER & EXTRACURRICULAR ACTIVITIES

- **Tribhuvan University Students Exploration Chapter** – Organized geological field trips and workshops.
 - **Amnesty International – Trichandra Youth Network** – Community awareness campaigns and social advocacy.
 - **Youth Red Cross – Trichandra Chapter** – Assisted health outreach programs and blood donation drives.
-

PERSONAL DETAILS

- **Date of Birth:** February 27, 2003
 - **Citizenship:** Nepali
 - **Languages:** Nepali (native), English (fluent), Hindi (conversational)
 - **Address:** Taplejung, Nepal
